

# TECH TOOLS TO PROMOTE CRITICAL THINKING IN ELT

Steven Bukin

The line graph shows the number of people who are 65 years old <sup>and over</sup> in different countries from 1940 to 2040. Years are on the Y axis while the percentage <sup>age is</sup> on the X axis.

As can be seen the number of old people in Japan decreased in 1960 and then remained stable until 1980 (3%). In USA, the population of people <sup>were</sup> who <sup>are</sup> 65 and over increased slightly in 1960. After that the number went up fastly <sup>dramatically</sup> from 8% to 15% in 1980. The number of old people in Sweden was the same for <sup>the</sup> USA but in Sweden the percentage was <sup>a</sup> <sup>little</sup> bit lower.

The percentage in Japan rose from 5% to 25% in 2040 and it <sup>will</sup> continue rising in the future.

## TECH TOOLS
